DETAILED ACTION

Response to Amendment

Applicant's amendment filed April 30, 2007 has been thoroughly reviewed and considered by the examiner. It is noted that applicant has canceled claim 32 in the amendment. The rejection of claim 32 as set forth in the prior Office action is therefore now moot. Applicant has provided proper consent of all assignee(s) as required.

The finality of the prior Office action is withdrawn so that the newly applied rejection may be applied at this time to advance the application toward condition for allowance. It is noted that the Reissue declaration stated that the original patent is wholly or partly inoperative or invalid by "reason of a defective specification or drawing." Applicant has not explained how the specification or drawing is defective. Moreover, it appears that the requested insertion of the several paragraphs at column 4, line 14 contains elements not recited in the original patent, i.e., "drive train 86," "holding bars 92," etc. Thus, it appears that applicant has attempted to enter new matter. It is also noted that the reference numerals for the amended specification section do not correspond to the reference numerals in the drawings.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3753

Claims 25-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims are readable as reciting limitations not disclosed in the originally filed specification, i.e., "drive train" and "operator."

Allowable Subject Matter

Claims 1-24, 30 and 31 are allowed.
